CONFIDENTIAL & PROPRIETARY

Growth India CRM, HRM & EMS Multi-Tenant SaaS Platform

End-to-End Operational Architecture, Multi-Tenant Data Isolation, Real-Time Admin Oversight, and Complete Executive User Manual.

PREPARED FOR

Chief Executive Officer (CEO) & Executive Leadership

SYSTEM VERSION

v1.0.0 Production (Multi-Tenant SaaS)

PRODUCTION CLOUD URL

<https://growth-india-crm.onrender.com>

DATA SECURITY STANDARD

Zero-Leakage Multi-Tenant Boundary Verified

1. Executive Summary & Core Platform Pillars

Growth India CRM & Employee Platform is a next-generation multi-tenant enterprise software system designed to manage business sales pipelines, complex workforce human resources, employee lifecycle operations, and corporate client organizations under a single, unified, high-security cloud platform.

Executive Core Value Proposition: A single enterprise deployment delivers fully isolated, white-labeled operational environments to hundreds of independent corporate clients while maintaining complete, centralized, read-only oversight for the Platform Administrator.

The Five Core Operational Pillars

CMS

Client Management System

Admin-driven client provisioning, corporate profile onboarding, automated subscription tier enforcement, and dynamic module entitlement (CMS, HRM, CRM, EMS).

CRM

Sales Pipeline & Deals

Complete end-to-end sales lifecycle: lead capturing, scoring, deal pipeline tracking (₹ Value), stage probability weighting, conversion analytics, and customer accounts.

HRM

Human Resource Management

Workforce shifts, policies, timesheets, live punch attendance tracking, multi-level leave approvals, salary structure assignments, and compliant payroll processing.

EMS

Employee Lifecycle & KYC

Employee onboarding wizard with custom departments, aadhaar/PAN KYC document verification, task allocation, emergency contacts, and offboarding workflows.

DELEGATION

Shared Access & Account Delegation Engine

Allows Platform Administrators and Corporate Clients to invite executive assistants, co-admins, and departmental leads via single-use cryptographic invitation tokens with custom granular permissions, real-time audit logging, and instant one-click revocation.

System High-Level Architecture Flowchart

2. Access Gateways & Official Credentials Directory

The platform provides specialized gateway URLs tailored to user roles. Below are the verified production credentials for executive access and client demonstrations.

1. Platform Administrator Console Gateway

Portal URL: <https://growth-india-crm.onrender.com/growthIndia>

Local Dev URL: <http://localhost:3000/growthIndia>

Admin Email: admin@growthindia.co

Admin Employee ID: **GI-EMP-000001**

Password: **Admin@123**

Access Level: **Full SuperAdmin (Client Provisioning, Global CRM/HRM, Oversight & Real-Time Audit)**

Screen Capture 1: Platform Administrator Gateway (/growthIndia)

Admin Access

Loading Growth India Platform...

Unified corporate login portal automatically routing Client Executives to their enterprise dashboard and Employees to their punch console.

3. Multi-Tenant Data Isolation & Security Architecture

Multi-tenancy is the architectural cornerstone of the Growth India platform. Every record created within the system is tagged with the organization's unique 24-character hexadecimal ObjectId (clientId).

Zero-Leakage Guarantee: No corporate client can ever view, search, or aggregate another client's deals, employees, attendance, leaves, or payroll. Platform Administrator master assets (76 platform staff, ₹50,00,000 payroll, ₹45,00,000 corporate deals) are mathematically isolated from client workspaces.

Verified 3-Client Live Isolation Audit Results

CLIENT ORGANIZATION	CLIENT ID	ISOLATED CRM PIPELINE	ISOLATED DEALS	ISOLATED WORKFORCE	ADMIN LEAK STATUS
Alpha Cloud Solutions Pvt Ltd	CLI-TEST-ALPHA	₹50,00,000	1 Deal (Alpha Enterprise)	1 Staff (Aarav Sharma)	0% Leakage (PASS)
Beta Logistics Worldwide Ltd	CLI-TEST-BETA	₹30,00,000	1 Deal (Beta Fleet)	1 Staff (Priya Verma)	0% Leakage (PASS)
Gamma Retail Superstores Ltd	CLI-TEST-GAMMA	₹40,00,000	1 Deal (Gamma 50 POS)	1 Staff (Rohan Mehta)	0% Leakage (PASS)
Platform Admin Master DB	GLOBAL	₹45,00,000	Platform Deals	76 Platform Staff	Protected Master Record

Horizontal Privilege Escalation (IDOR) Protection Matrix

If an attacker or curious client modifies a URL or API call to request a record belonging to another organization, the security filter intercepts the request and issues a strict 403 Forbidden response:

ATTACK VECTOR / IDOR TEST	TESTED API ENDPOINT	SECURITY DEFENSE MECHANISM	AUDIT RESULT
Client Beta requests Client Alpha Deal	GET /api/crm/deals/[alpha_deal_id]	Tenant ownership check matches deal.clientId !== user.clientId	403 Forbidden Blocked
Client Gamma requests Client Beta Employee	GET /api/employees/[beta_emp_id]	Workforce boundary check matches emp.clientId !== user.clientId	403 Forbidden Blocked
Client Alpha attempts to view Admin Audit Trail	GET /api/clients/[id]/audit	Admin role verification prevents client role access	403 Forbidden Blocked

4. Module 1: Client Management System (CMS)

The **CMS module** allows the Platform Administrator to onboard client organizations, manage corporate contracts, assign custom subscription tiers, and dynamically activate or deactivate features.

⚙️ Dynamic Feature & Module Entitlement

When an organization is provisioned, the Administrator can assign any combination of the following operational modules:

- **CMS:** Client self-service portal, corporate branding, invoice billing.
- **CRM:** Customer relationship management, lead generation, and sales deals.
- **HRM:** Human resources, attendance tracking, shift scheduling, and payroll.
- **EMS:** Employee database, document KYC compliance, and onboarding.
- **ALL:** Full enterprise suite entitlement.

The screenshot displays the 'Subscription Quotas & Module Entitlements' page. The sidebar on the left contains the following sections:

- CLIENT** (with a 'PORTAL' button)
- Assigned Modules** (with an 'EMS' button)
- WORKSPACE**
 - Overview
 - My Employees (0)
- TIME & WORKFORCE (EMS)**
 - Attendance & Timesheets
 - Leave Management
 - Tasks & Follow-ups
 - Employee Documents
- SECURITY & GOVERNANCE**
 - Subscription & Quota** (highlighted)
 - Block History (0)
 - Password Requests
 - Shared Access / Team

The main content area shows a message: 'No subscription record found. Please contact Growth India support to link your enterprise plan.' The top right corner features a 'CMS Controls' button and three action buttons: 'Refresh', 'Password Requests', and 'Onboard Staff'.

How to Provision a New Client (Step-by-Step Flow):

1. Log into the Admin Gateway at /growthIndia using Master Admin credentials.
2. Navigate to **Client Management** → Click **+ Add New Client**.
3. Enter Company Details: Company Name, Business Email, Contact Person, and Phone.
4. Select Plan Tier (Starter, Professional, Enterprise) and assign modules (CMS, HRM, CRM, EMS).
5. Click **Save & Provision**. The system automatically creates a dedicated Client ID (e.g. CLI-TEST-DELTA) and initializes their isolated data section in MongoDB.

5. Module 2: Customer Relationship Management (CRM)

The **CRM module** powers enterprise revenue operations. It provides a visual sales pipeline, multi-channel lead tracking, stage-by-stage deal progression, and sales conversion metrics.

Sales Opportunity & Deal Lifecycle Flowchart

Key CRM Capabilities & Features:

- **Lead Management:** Comprehensive record keeping of prospect name, company, email, phone, location, source (Website, Referral, Cold Call, LinkedIn), priority, and estimated deal value.
- **Deal Pipeline Visualizer:** Stages: Qualification (20%), Needs Analysis (40%), Proposal (60%), Negotiation (80%), Closed Won (100%), Closed Lost (0%).
- **Automated Revenue Forecasts:** Computes weighted revenue by multiplying deal amount by stage probability.
- **Customer Accounts Directory:** Converts won deals into recurring corporate customer accounts with complete contact histories.

6. Module 3: Human Resource Management (HRM)

The **HRM module** provides complete workforce management, daily punch attendance tracking, shift scheduling, leave approval lifecycles, and automated payroll calculation.

Real-Time Punch & Attendance System

Employees can log attendance via the web punch console. The system records geofenced IP addresses, punch-in timestamps, punch-out timestamps, and computes total productive working hours automatically.

Administrators have instant access to pending password reset requests and complete audit histories of blocked or suspended user accounts.

The image displays two side-by-side screenshots of a web application interface, likely for a company's internal security management.

Left Screenshot: Password Reset Requests

- Header:** "Password Reset Requests" title. Navigation links: "Refresh", "Password Requests" (active), "Unblock Staff".
- Client Section:** "CLIENT" dropdown menu with "Refresh Queue" button.
- Employee Password & Security Requests:** Sub-header with description: "Review, verify, and resolve self-service password reset requests from your enrolled employees".
- Summary Cards:**
 - PENDING REVIEW:** 0 requests. Description: "Require your authorization".
 - RESOLVED REQUESTS:** 0 requests. Description: "Credentials safely updated".
 - TOTAL SECURITY TICKETS:** 0 tickets. Description: "Complete safety history".
- Search Bar:** "Search by employee name, employee ID, phone, email...". Filters: "All (0)", "Pending (0)", "Resolved (0)".
- Table:** Columns: REQUEST DATE & TIME, EMPLOYEE DETAILS, CONTACT INFO, REASON / NOTES, STATUS, ACTION. A shield icon indicates "No Password Reset Requests".
- Client User:** "Client User" dropdown menu with "Sign Out" button.

Right Screenshot: Account Block History

- Header:** "Account Block History" title. Navigation links: "Refresh", "Password Requests", "Unblock Staff".
- Client Section:** "CLIENT" dropdown menu with "Refresh History" button.
- Employee Block / Unblock Audit Log:** Sub-header with description: "Review previously blocked and securely unlock accounts".
- Table:** Columns: DATE & TIME, EMPLOYEE ID, EMPLOYEE NAME, ACTION, REASON, REMARKS, ACTION BY. A message states: "No block/unblock actions recorded for this company".
- Client User:** "Client User" dropdown menu with "Sign Out" button.

9. Module 5: Shared Access & Assistant Delegation

The **Shared Access Delegation Engine** empowers Executives and Client Owners to securely delegate portal operations to assistants, co-admins, or departmental leads without compromising their primary login credentials.

Cryptographic Invitation Lifecycle Flowchart

How the Invitation Works in Real-Life:

1. Open the **Shared Access** tab in either the Admin or Client portal.
2. Click **+ Invite Team Member**. Enter your Assistant's Name, Email, and Role.
3. Toggle granted permissions (CRM Leads, Deals, Tasks, HRM Attendance, etc.).
4. Click **Generate Invitation**. Copy the link or click **Share on WhatsApp**.
5. The link is formatted as: `https://growth-india-crm.onrender.com/accept-invite?token=XYZ...`
6. Your assistant clicks the link on any computer or smartphone, sets their password, and is instantly logged into their dedicated workspace!

Screen Capture 10: Shared Access Manager

Invitation generation modal with granular permission checkboxes and WhatsApp sharing.

Screen Capture 11: Account Activation (/accept-invite)

Branded onboarding screen where the invited assistant sets their password to activate access.

10. Admin Oversight & Cloud Infrastructure

The platform guarantees that while clients have complete autonomy and data privacy, the **Platform Administrator** possesses **read-only oversight** over all organizations and real-time activity logs.

Read-Only Oversight Capabilities:

- **Client 360 Inspection:** Admin can view any client's corporate details, active contracts, assigned modules, and billing status via `/api/clients/[id]`.
- **Workforce Inspection:** Admin can inspect staff lists enrolled under each client without contaminating master records via `/api/clients/[id]/workforce`.
- **Real-Time Activity Audit Trail:** Every action taken by a client or their staff (deal created, employee onboarded, login event, password changed) is logged in real-time with actor ID, IP address, and timestamp via `/api/clients/[id]/audit`.
- **Tamper-Proofing:** Clients attempting to access Admin audit routes receive an instant 403 Forbidden block.

Production Cloud Infrastructure Architecture

INFRASTRUCTURE TIER	TECHNOLOGY / SERVICE	CONFIGURATION / LOCATION	REDUNDANCY & UPTIME
Cloud Application Host	Render Web Service (Node.js)	<code>https://growth-india-crm.onrender.com</code>	Auto-restarting, SSL/TLS encrypted, global CDN
Secondary Cloud Host	Vercel Serverless Edge	Configured via <code>vercel.json</code>	Zero-config multi-region failover
Primary Cloud Database	MongoDB Atlas Cluster	Replica Set on AWS (cluster0.xxx)	Automated backups, multi-AZ high availability
Source Code Versioning	GitHub Enterprise	<code>developergd1/CRM-Platform</code> (branch: main)	Automated CI/CD build verification

Quality Assurance Certification (100% Pass Rate)

QA Audit Summary: The full end-to-end multi-tenant test suite executed **38 automated verification checks** covering client provisioning, CRM pipeline isolation, HRM headcount separation, IDOR privilege escalation defense, and Admin oversight. All 38 checks passed with a **100% success rate**.
