1. Platform Architecture & Multi-Tenant Foundations

The **Growth India Enterprise SaaS Platform** is a modern, high-performance, multi-tenant cloud application engineered to handle the complex operational requirements of Indian corporate enterprises and global businesses.

The platform integrates three core operating engines into a unified ecosystem:

- 1. **CMS (Client Management System):** Manages external corporate client organizations, their subscription tiers, feature access modules, and employee quota limits.
- 2. **HRM (Human Resource Management):** Governs applicant recruitment (ATS), employee 360° profiles, biometric attendance telemetry, leave ledgers, Indian statutory payroll (EPF, ESI, Professional Tax, TDS), quarterly appraisals (PMS), and internal helpdesks.
- 3. **CRM (Customer Relationship Management):** Streamlines enterprise sales pipelines, lead capturing, B2B company accounts, quotation drafting, and closed-won deal forecasting.

Role-Based Access Control (RBAC) Matrix

Role	Identifier	Operational Scope & Permissions
Platform Super Admin	SUPER_ADMIN / ADMIN	Unrestricted platform authority. Manages all client organizations, global system configuration, audit logs, and delegates admin invitations.
Client Administrator	CLIENT	Organization-level tenant owner. Manages company staff, internal departments, attendance policies, and client billing details.
HR Manager	ADMIN_HR	Executes talent acquisition (ATS), processes monthly payroll calculations, approves leaves, and regulates attendance anomalies.
Team Manager	MANAGER	Team leadership scope. Reviews assigned direct reportees, approves leave requests, reviews shift attendance, and conducts performance appraisals.
Employee	EMPLOYEE	Employee Self-Service (ESS). Performs daily check-in/out punches, requests leave, submits regularization tickets, and downloads payslips.

Strict Multi-Tenant Isolation

Every request across APIs and database queries validates tenant isolation server-side. Records belonging to Organization A are strictly segregated from Organization B, preventing cross-tenant data leakage even under direct API exploration.

2. System Authentication & Security Gateway

To access the central administration console, navigate to the secure gateway URL:

🔗 **URL:** `http://localhost:3000/growthIndia` (or your company's production domain)

Figure: Admin Login View

Step-by-Step Login Procedure:

1. **Admin Email ID:** Enter your registered administrative email address (e.g., `admin@growthindia.co`).
2. **Password:** Enter your secure password (default: `Admin@123`).
3. Click the password visibility icon (eye) to verify character accuracy if needed.
4. Click the **"Sign In to Admin Portal"** button.
5. The backend validates your credentials using one-way salted `bcrypt` hashes. Upon verification, the server generates a cryptographically secure, HTTP-only cookie named `growth_session_token`.

Note: If a non-administrative user (such as a standard employee or external client) attempts to sign in via this URL, the authentication middleware intercepts the session and automatically redirects them to their designated portal (`/client` or `/employee`).

3. Admin Governance Gateway & Navigation

Upon authenticating, administrators arrive at the **Admin Governance Center** (Operating Platform Gateway):

Figure: Admin Platform Gateway

Key Gateway Navigation Elements:

1. Top Header Bar:

- **Growth India Logo:** Returns to the root landing interface.
- **Admin Governance Center Badge:** Confirms an active administrative session.
- **System Administrator Profile:** Displays the current logged-in admin identity and email.
- **"Admin Team" Button:** Quick trigger to manage internal administrator invitations.
- **Sign Out Icon:** Securely terminates the session and revokes the active token.

2. Operating Platform Cards:

- **CMS (Client Management System):** Gateway to client organizations, subscription plans, and tenant billing. Click **"Enter CMS →"**.
- **HRM (Human Resource Management):** Gateway to internal workforce operations, biometric logs, statutory payroll, and recruitment. Click **"Enter HRM →"**.

3. Platform Switcher Dropdown:

Located at the top-right of every sub-screen, this dropdown allows instantaneous switching between **CMS**, **HRM**, and **CRM** without requiring re-authentication.

4. Admin Team & Delegated Governance

Clicking the "Admin Team" button in the top navigation bar opens the administrative delegation modal:

Figure: Admin Team Management Modal

Capabilities & Controls:

- **Live Telemetry Cards:**
 - **Total Invitations:** Cumulative count of administrative invites generated.
 - **Active Admins:** Administrators with verified, active access credentials.
 - **Pending Activations:** Unclaimed invitation links awaiting initial account setup.
 - **Live Online:** Real-time count of administrators currently connected to the console.
- **+ Invite Administrator:**
 - Click this button to invite a new HR Director, Operations Lead, or Co-Administrator.
 - Enter the candidate's Full Name, Official Email Address, Mobile Number, and Delegated Role (`SUPER_ADMIN` , `ADMIN_HR` , `OPERATOR`).
 - The platform generates a cryptographically random, single-use token embedded within a secure registration link.
- **Security Safeguards:**
 - Each invitation URL can be consumed exactly **once**.

- To prevent token replay vulnerabilities, the invitation record immediately transitions to **ACCEPTED** upon account creation.

5. CMS — Client Management System

Selecting "Enter CMS" from the platform gateway opens the **Client Management Hub**:

Figure: CMS Hub

This command center provides three foundational administrative modules:

1. **CMS Dashboard:** Global client metrics, tenant utilization, and tier distributions.
2. **Client Onboarding:** A structured wizard for registering new enterprise clients.
3. **Clients / Organizations:** Master directory of all active and inactive corporate accounts.

5.1 CMS Dashboard & System Telemetry

Figure: CMS Dashboard

- **System Health & Resource Utilization:** Monitors active client organizations, active workforce counts, and server load distributions.
- **Revenue Tier Distribution:** Categorizes organizations across subscription plans (**STARTER** , **GROWTH** , **ENTERPRISE_PRO**).
- **Password Reset Requests:** The header includes a "Reset Requests" button that lets administrators review and resolve employee password lockouts in a single click.

5.2 Client Onboarding Wizard

To onboard a new enterprise client, click **Client Onboarding**:

Client Onboarding Wizard
Directly register an enterprise organization, generate sequential Client ID, assign modules, and provision account credentials.

1. ORGANIZATION & LEGAL ENTITY DETAILS
Official business information for the corporate client record.

Company Name *
e.g. Apex Global Technologies Pvt Ltd

Contact Person Name *
e.g. Vikramaditya Rathore

Mobile Number *
e.g. 9876543210

Official Email (Portal Login)
e.g. admin@apextech.com (optional, auto-generated if blank)

Industry Sector
IT & Software Services

Company Entity Type
Private Limited (Pvt Ltd)

GST Number (Optional)
E.g., 07AAAAA0000A1Z5

Account Status
ACTIVE (Authorized to login)

Corporate Address
Registered office address, city, state, postal code

Onboarding Remarks / Scope
Internal onboarding notes, project reference, or contract number

2. MODULE SUBSCRIPTIONS & ENTITLEMENTS
Select which software engines this client is authorized to access. Any combination is valid. 1 selected

Figure: Client Onboarding Wizard

Structured Onboarding Steps:

1. Legal Entity & Corporate Details:

- ***Company Name :** Full legal entity name (e.g., *Shree Cement Works Ltd*).
- ***Contact Person Name :** Primary authorized liaison (e.g., Managing Director or Head of HR).
- ***Mobile Number :** Direct contact phone number.
- **Official Email (Portal Login):** Dedicated email used for client portal root access.
- **Industry Sector:** Industry vertical (IT, Manufacturing, Logistics, Financial Services, etc.).
- **Company Entity Type:** Private Limited, LLP, Partnership, Sole Proprietorship, etc.
- **GST Number (Optional):** Goods and Services Tax Identification Number.
- **Corporate Address:** Registered headquarters address.

2. Software Module Subscriptions:

- Check the modules included in the client's commercial agreement:
 - **EMS** (Employee Management System)
 - **CRM** (Customer Relationship Management)
 - **ATTENDANCE** (Biometric Sync & Timesheet Engine)
 - **PAYROLL** (Statutory Salary & Compliance Engine)

3. Employee Quota Limit:

- Set the maximum authorized headcount (`maxEmployees` , e.g., 100, 500, 1000). The backend strictly enforces this threshold, preventing client admins from onboarding staff beyond their licensed allotment.

4. Account Creation:

- Submitting the form generates a unique tenant identifier (e.g., `CLI-00020`) and dispatches an automated setup email to the client admin.

5.3 Clients Directory Master

To review and manage all registered corporate entities, open **Clients / Organizations**:

Clients & Organizations Directory 105 of 105
Production directory of all enterprise tenants, accounts, and assigned modules.

Search by Client ID (CLI-XXXXX), Company Name, Contact Person, Mobile, or Email...

All (105) Active (105) Inactive (0) All Industries

Figure: Clients Directory Master

Grid Controls & Information:

- Live Search Bar:** Instantly query by Client ID (`CLI-XXXXX`), Company Name, Contact Person, or Email.
- Status Filter Tabs:** Switch between `All` , `Active` , and `Inactive` records.
- Data Columns:**
 - Client ID:** Permanent system-generated identifier.
 - Company Name & Staff Usage:** Displays current enrolled workforce vs. maximum purchased capacity (e.g., `0 / 1000 Staff`).
 - Contact Person:** Authorized representative details.

- **Status Badge:** Visual indicator showing **ACTIVE** (emerald green) or **SUSPENDED** (crimson red).
- **Assigned Modules:** Enabled functional suites (e.g., **EMS**, **CRM**).
- **Row Actions:**
 - **Open EMS** ↗: Launches the dedicated workforce management console for that client.
 - **View / Edit:** Allows updating corporate profile information, contact points, or subscription quotas.

5.4 Client-Specific Workforce Console (EMS)

Clicking "Open EMS" on any client row opens that client's isolated administrative environment:

Figure: Selected Client Governance

Available Sub-Views:

- **Client Account & Profile:** Corporate registration details, tax identifiers, and contact points.
- **Assigned Modules:** Enables or disables licensed feature suites in real time.
- **Client-Specific EMS:**
 - **Employees:** Master list of all staff members enrolled under this specific organization.
 - **+ Enterprise Onboarding:** Directly enroll new employees under this tenant.
 - **Attendance:** Live punch logs and biometric timesheet records for the client's staff.
 - **Leave:** Pending and historical leave applications submitted by client employees.

- **Tasks:** Delegation board for assigning internal project responsibilities.
- **Export CSV:** Exports complete workforce records to an Excel-compatible CSV file.

6. HRM — Human Resource Management Suite

Selecting "HRM Suite" from the platform switcher opens the internal human resources operating console:

Figure: HRM Modules Hub

The HRM Suite is structured into 6 primary operational domains:

1. **HRM Dashboard:** Executive KPIs, live workforce telemetry, and payroll liabilities.
2. **Workforce & Organization:** 9-stage lifecycle Kanban, 360° employee profiles, branches, and applicant tracking (ATS).
3. **Time & Attendance:** Real-time biometric punch logs, shift schedules, and regularization approvals.
4. **Payroll & Compensation:** 5-step statutory payroll calculation, compliance deductions, and payslip distribution.
5. **Performance & Helpdesk:** Quarterly OKR tracking, appraisal workflows, and internal ticketing.
6. **Governance & Automation:** Approval chains, policy parameters, and audit logging.

6.1 HRM Command Center & Telemetry Dashboard

Figure: HRM Command Center Dashboard

Real-Time Telemetry Cards:

- **Total / Active Staff (129 / 129 Enrolled):** Total headcount currently enrolled in the internal organization.
- **Present Today (6, 4 Late Arrival):** Real-time count of staff who completed biometric punch-ins, including late check-ins.
- **On Leave & Pending (9 Pending):** Staff members currently on leave alongside pending applications awaiting review.
- **Active Goals / OKRs (4 Active):** High-priority organizational objectives currently being tracked.
- **Current Payroll Cycle Snapshot (PAY-2027-02):**
 - Operational Status: **PENDING_REVIEW**
 - Gross Payroll Liability: **₹1,769,168**
 - Cumulative Deductions: **-₹161,157**
 - Net Payable Disbursement: **₹1,623,686**
- **Real-time HR & Compliance Audit Stream:**
 - An immutable, timestamped record documenting every administrative action (profile modifications, status updates, payroll reviews).

6.2 9–Stage Workforce Lifecycle Kanban

To oversee employee transitions from hire to departure, open **Workforce & Organization**:

Figure: Workforce Lifecycle Kanban

The 9 Standard Lifecycle Stages:

1. **Preboarding:** Offer accepted; document submission and background verification underway.
2. **Onboarding:** IT asset allocation, account creation, and orientation in progress.
3. **Probation:** Initial trial assessment period (typically 3 to 6 months).
4. **Active Staff:** Fully confirmed permanent workforce members.
5. **On Notice:** Formal resignation submitted; serving statutory notice period.
6. **Resigned:** Notice period completed; pending final clearance.
7. **Relieved:** No-dues certification signed, assets returned, and exit letters issued.
8. **Retired:** Superannuated staff with pension/gratuity settlements completed.
9. **Terminated:** Disciplinary separation or performance-based exit.

Pro Tip: To advance an employee to the next stage, click "**Move Stage →**" on their card. The platform automatically updates the database and triggers appropriate lifecycle workflows.

6.3 Employee 360° Comprehensive Profile

Clicking **"360 Profile"** on any employee card reveals their complete master file:

Figure: Employee 360 Governance Profile

Comprehensive Profile Sub-Tabs:

- Overview:** Summary card with official ID (`emp-beta-05435`), designation, department, joining date, standard shift timings (`10:00 AM - 07:00 PM`), and current attendance status.
- Personal Info:** Residential address, blood group, emergency contact details, PAN, and Aadhaar numbers.
- Employment:** Reporting manager hierarchy, assigned operating branch, and employment contract type.
- Salary Profile:** Annual CTC, monthly gross, basic component breakdown, special allowances, and statutory eligibility flags (PF/ESI).
- Attendance:** Monthly biometric punch logs, shift adherence data, and total working hours.
- Timesheets:** Project work logs, billable tracking, and logged overtime hours.
- Leaves & Balances:** Real-time balances across Casual Leave (CL), Earned Leave (EL), and Sick Leave (SL).
- Payroll & Payslips:** Complete history of processed monthly payslips.

Direct Administrative Actions:

- Assign / Edit Salary:** Reconfigures monthly compensation and component percentages.
- Edit Compliance & Remittance:** Updates bank account details, IFSC code, and statutory UAN/ESI numbers.
- Access Control:** Triggers an immediate password reset or suspends account login privileges.

6.4 Organization Architecture & Hubs

To configure corporate branches, departments, and designations, navigate to **Organization Setup**:

Organization Architecture GROWTH-INDIA + Add Department

Manage company profile, departments, designations, locations, and working calendars.

Growth India Technologies
Enterprise IT & Software Solutions
Plan: **ENTERPRISE_PRO** • Contact: hr@growthindia.in

OPERATING LOCATIONS & HUBS

Figure: Organization Architecture

Core Configuration Components:

- Operating Locations & Hubs:**
 - Noida (HQ), Bengaluru Tech Center, Mumbai Corporate Office, Remote.
 - Add new branches with complete address details and geolocation boundaries.
- Working Schedule & Business Hours:**
 - Working days (e.g., Monday through Saturday), shift durations, and weekend policies.
- Departments Directory:**
 - Engineering & DevOps* (Code: **ENG**, 28 Active Staff)
 - Enterprise Sales* (Code: **SALES**, 18 Active Staff)
 - Human Resources & Talent* (Code: **HR**, 8 Active Staff)
 - Client Success & Ops* (Code: **OPS**, 14 Active Staff)
 - Click "**+ Add Department**" to define new business units.
- Designations & Hierarchy:**

- Defines roles (VP of Technology, Senior Full Stack Engineer, QA Architect) and seniority levels (Executive, Senior, Mid, Entry).

6.5 Recruitment & ATS Talent Pipeline

To manage the hiring process from posting to conversion, open **Recruitment & ATS**:

Figure: Recruitment & ATS Pipeline

End-to-End Talent Pipeline Stages:

1. **+ Post Opening:** Create a new job requisition specifying role title, target department, required experience, and salary range.
2. **+ Add Candidate:** Register applicant profiles, attach CV documents, and record initial contact information.
3. **Kanban Pipeline Stages:**
 - **Applied:** Newly received candidate applications.
 - **Screening:** Initial resume review and qualification check.
 - **Interviewing:** Technical, managerial, and culture evaluation rounds.
 - **Offer Sent:** Formal offer letter issued with proposed CTC.
 - **Hired / Converted:** Once the offer is accepted, a single click converts the candidate directly into an active record within the **Employee Master (EMS)**!

6.6 Time & Biometric Attendance Telemetry

To track daily employee presence, punch times, and shift compliance, open **Time & Attendance**:

Figure: Time & Attendance Telemetry

Key Operational Features:

- **Digital Punch Clock:**
 - **Punch Check-In:** Records arrival timestamp.
 - **Punch Check-Out:** Records departure timestamp and computes net hours worked.
- **Telemetry Metrics:**
 - **Present Today:** Total verified biometric check-ins for the day.
 - **Late Arrivals:** Check-ins recorded after the shift grace threshold (e.g., post 09:45 AM).
 - **Unexcused Absences:** Unscheduled absences that trigger automatic Loss of Pay (LOP) calculations during payroll runs.
 - **Average Work Hours:** Rolling daily average hours worked across active teams (benchmark: 8.5 hours).
- **Regularization Requests:**
 - If an employee misses a biometric punch due to network or field issues, they submit a regularization request explaining the discrepancy.
 - Administrators can **Approve** or **Reject** the request with one click, automatically updating the attendance ledger.

6.7 Leave Ledger & Quotas

To administer annual leave policies, balances, and employee time-off requests, open **Leave Ledger & Approvals**:

Leave Ledger & Approvals

Time-Off & Leave Management
Unified leave requests, balance tracking, manager approvals, and automated Loss Of Pay (LOP) integration for payroll.

Casual Leave (CASUAL): 10 Days Left, Used: 2

Earned / Privilege Leave (EARNED): 15 Days Left, Used: 0

Sick Leave (SICK): 10 Days Left, Used: 0

Loss of Pay (Unpaid Leave) (UNPAID): 0 Days Left, Used: 0

LEAVE APPLICATIONS INBOX 62

APPLICATION #	EMPLOYEE	TYPE	DURATION	REASON	STATUS	ACTIONS

System Administrator
UI-EMP-0000001
Sign Out

Figure: Leave Ledger & Approvals

Leave Categories & Balance Tracking:

- **Casual Leave (CL):** 10 Days Available (short-term personal leave).
- **Earned / Privilege Leave (EL):** 15 Days Available (accrued paid annual leave).
- **Sick Leave (SL):** 10 Days Available (medical and health leave).
- **Loss of Pay (LOP):** Unpaid absence (each day approved reduces monthly payable salary).

Leave Applications Inbox:

- Review pending requests detailing applicant name, leave type, date range (e.g., **11/20/2026 to 11/20/2026** • **1 day**), and reason.
- Click **"Approve"** to grant the leave, deducting days from the employee's ledger and recording the absence in the calendar.
- Click **"Reject"** to decline the request with an explanation note.

6.8 Payroll & Statutory Compliance Engine

Payroll is a critical financial process within the platform, driven by a **5-step automated calculation engine**:

Figure: Payroll & Statutory Compliance Engine

The 5-Step Payroll Lifecycle:

- Select Period:** Choose target payment month and year (e.g., **PAY-2027-02**).
- Fetch Data:** Aggregates employee CTC profiles, 30-day biometric logs, approved LOP days, and active loan EMI deductions.
- Calculate Payroll:** Click "**Calculate Payroll**" to execute statutory earnings and deduction calculations across all eligible employees.
- Approve Run:** Payroll administrators review discrepancy reports under the Audit Exceptions tab before clicking "**Approve Run**".
- Finalize & Lock:** Clicking "**Finalize & Lock**" permanently seals the payroll run, creating immutable financial records and generating official payslips.

Indian Statutory Deductions Reference:

- Employee Provident Fund (EPF – 12%):** Deducted at 12% of **Basic + DA**, capped at a statutory ceiling of ₹15,000 (₹1,800.00 maximum per month).
- Employee State Insurance (ESI – 0.75%):** Applies when monthly gross salary is ≤ ₹21,000\$. Employee contribution: **0.75%**; employer contribution: **3.25%**. Zero deduction if gross exceeds ₹21,000.
- Professional Tax (PT):** State-specific monthly slabs (e.g., ₹200.00 per month in Maharashtra/Karnataka).

- **TDS (Income Tax):** Monthly estimated withholding based on annual income tax slab calculations.
- **Loss of Pay (LOP) Proration Formula:**
$$\text{Per-Day Deduction} = \left(\frac{\text{Monthly Gross Salary}}{30}\right) \times \text{LOP Days}$$

6.9 Payslip Generation, Distribution & Ledger

Once payroll is locked, official payslips appear under the **Processed Records** tab:

Figure: Payroll Processed Records

Payroll Ledger Data Columns:

- **Employee:** Name and official employee code.
- **Base CTC:** Fixed annual compensation structure.
- **LOP Deduction:** Calculated deduction for unexcused absences.
- **Gross Earnings:** Total earned compensation for the month.
- **Deductions:** Sum of PF, ESI, Professional Tax, TDS, and loan repayments.
- **Net Salary:** Final net amount disbursed to the employee's bank account.

Payslip Review & Distribution:

- Click **"View Slip"** to inspect a detailed statement including currency values in words using the Indian numbering system (*"Sixty-Nine Thousand Two Hundred Fifty Rupees Only"*).

- Employees can immediately view and download their PDF payslips through their self-service portal (ESS).

6.10 Performance Management (PMS) & OKR Tracking

To run employee goal cycles and performance reviews, open **Performance & Helpdesk** to **PMS & Performance**:

Figure: Performance Management PMS

- **Goals / OKRs:** Establish high-level organizational objectives and cascade them to individual key results.
- **Weightage & Progress:** Track goals by assigned weight (e.g., 25%, 30%) with visual completion percentage bars.
- **Propose Appraisal:** Following review cycles, managers submit merit ratings and recommend compensation increments (%), which automatically flow into subsequent payroll runs upon approval.

6.11 HR Helpdesk & Employee Requests

To address internal employee requests and workplace tickets, open **HR Helpdesk & Requests**:

Search Client ID, Employee, Lead, Deal...

Reset Requests 1

All HRM Modules

HRM Suite

GI-EMP-0000001

Sign Out

Figure: HR Helpdesk & Requests

- **Formal HR Documentation Requests:**
 - *Bonafide Certificate for Visa Processing*
 - *Salary Certificate for Home Loan Application*
 - *Residential Address & Contact Detail Update*
 - Administrators review and resolve requests with a single click (**Approve / Reject**).
- **Internal Helpdesk Tickets:**
 - Manages hardware issues, payroll discrepancies, and workplace grievances.
 - Tracked by priority tier (High, Medium, Low) with built-in SLA timers for resolution tracking.

7. CRM — Commercial Sales & Deal Pipeline

Selecting "CRM Sales" from the platform switcher opens the enterprise sales management console:

Figure: CRM Dashboard

Commercial Dashboard Metrics:

- **Open Pipeline (₹1,20,00,000):** Aggregate value of active commercial opportunities across all open stages.
- **Won Revenue (₹38,50,000):** Revenue secured from successfully closed deals in the current quarter.
- **Weighted Forecast (₹71,50,000):** Probability-weighted expected revenue based on deal pipeline stages.
- **Win Rate (100%):** Ratio of closed-won opportunities to total resolved deals.
- **Commercial Lifecycle Funnel:** $\text{Inbound Leads (6)} \rightarrow \text{Qualified Prospects (1)} \rightarrow \text{Converted to Deals (6)} \rightarrow \text{Closed Won Accounts (3)}$
- **Pipeline Stage Distribution:**
 - **Proposal:** ₹90,00,000 (2 Opportunities)
 - **Negotiation:** ₹30,00,000 (1 Opportunity)
 - **Won:** ₹38,50,000 (3 Accounts)

Sales Sidebar Modules:

- **Leads:** Capture inbound inquiries, record lead sources, and assign opportunities to sales representatives.
- **Contacts & Accounts:** Central directory of client organizations, corporate decision-makers, and key stakeholders.
- **Deals / Pipeline:** Drag-and-drop Kanban board for advancing opportunities through deal stages.
- **Quotes & Contracts:** Build formal commercial proposals and generate PDF contracts for client review.

8. Master End-to-End Operational Workflows (SOPs)

Workflow 1: Onboarding a New Corporate Client

1. From the top platform switcher, select **CMS** to click **Client Onboarding**.
2. Fill in Company Name, Contact Person Name, Email, Mobile Number, and Industry.
3. Check the licensed software modules (**EMS** , **ATTENDANCE** , **PAYROLL**).
4. Enter the maximum employee headcount limit (e.g., **500**).
5. Submit the form. The platform generates a unique tenant code (**CLI-XXXXX**) and emails setup instructions to the client administrator.
6. Open **Clients / Organizations** and click "**Open EMS**" on the new client to begin configuring their workforce.

Workflow 2: Enrolling and Setting Up a New Employee

1. Navigate to **HRM Suite** to **Workforce & Organization** to **Employees & 360**.
2. Click the "**+ Enterprise Onboarding**" button.
3. Enter the employee's Full Name, Email, Mobile Number, Designation, and Department.
4. Assign a Reporting Manager.
5. Enter compensation details (Annual CTC, Basic Salary, Allowances) and bank account numbers.
6. Submit the form. The employee record enters the **Preboarding / Onboarding** lifecycle stage with generated portal credentials.

Workflow 3: Running Monthly Payroll and Issuing Payslips

1. At the end of the pay cycle, navigate to **HRM Suite** to **Payroll & Compensation**.
2. Click "**+ New Payroll Run**" and select the target month (e.g., **2027-02**).
3. Click "**Calculate Payroll**". The engine analyzes 30-day biometric attendance logs, deducts LOP days, calculates statutory taxes (PF, ESI, PT), and derives net payable amounts.
4. Review the "**Audit Exceptions**" tab to check for missing bank or tax information.
5. Click "**Approve Run**" to sign off on the calculations.
6. Click "**Finalize & Lock**". The run is permanently locked, and individual payslips are published to the **Processed Records** tab and employee self-service portals.

Workflow 4: Processing Leave and Regularization Requests

1. Navigate to **HRM Suite** to **Time & Attendance**.

2. Open the **Regularization** tab to review missed punch requests submitted by employees.
3. Click **Approve** to accept an explanation, which updates the punch log and removes any associated LOP deduction.
4. Navigate to **Leave Ledger & Approvals** to review formal leave requests.
5. Click **Approve** to debit the requested days from the employee's leave balance and update the attendance calendar.

Workflow 5: Capturing a Lead and Closing an Enterprise Deal

1. Switch to **CRM Sales** via the top platform switcher & click **Leads**.
2. Click **" + Add Lead "** and record inquiry details and source channel.
3. Once qualified, click **"Convert to Deal"** to move the opportunity into the active sales pipeline.
4. Drag the deal card across the Kanban board through **Discovery**, **Proposal**, and **Negotiation**.
5. Generate a formal commercial quotation under **Quotes & Contracts**.
6. When the client signs the contract, move the deal to **Closed Won**. The platform updates revenue metrics and pipeline forecasts automatically.

9. Troubleshooting Guide & Frequently Asked Questions (FAQs)

Q1: An employee forgot their login password. How do I restore their access?

- **Solution:** Check the **"Reset Requests"** notification in the top header. If the employee submitted a request, click **"Reset Password"** to generate new credentials. Alternatively, open their **360 Profile** & click **Access Control** tab and initiate a direct password reset.

Q2: An employee missed a biometric punch. How do I prevent incorrect salary deductions?

- **Solution:** The employee must submit a **Regularization Request** through their self-service portal. An administrator then opens **Time & Attendance** & click **Regularization** and clicks **Approve**. The day is marked present, preventing automated LOP deductions during payroll processing.

Q3: Can a finalized payroll cycle be modified or recalculated?

- **Solution: No.** To uphold financial compliance, statutory auditability, and accounting integrity, any payroll run marked **FINALIZED** is permanently locked and immutable. If an adjustment is necessary, click **"Add Adjustment"** during the next monthly payroll run to process retroactive arrears or balance deductions.

Q4: Can administrators of Client A view employees or data from Client B?

- **Solution: Strictly no.** The Growth India platform implements multi-tenant isolation at the database and API query levels. Every database interaction enforces tenant validation, ensuring that organizations can only

access their own records.
